Acorn

The Acorn product which you have purchased has passed Acorn's quality testing before leaving the production line and we have made every effort to ensure that it gives you long and reliable service.

Acorn has a policy of continuous development and improvement so that new products will suit your future requirements. You can help us in this process by completing and returning the attached Owner Registration Card. It will also enable us to keep you informed of new products and upgrades as they become available (unless, of course, you elect not to receive new product information).

If you are registering more than one similar product for use at any one site, you need only complete one card; simply bundle the cards together, complete the top card and send the whole bundle to us.

Returning the Owner Registration Card does not affect your statutory rights in any way. Please complete the details below and retain this portion for your reference. Thank you for your help.
